DETAILED ACTION

Allowable Subject Matter

1. Claims 10, 12, 15, 16, and 18-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Amano et al. (US 2003/0027896) is the closest prior art. They simultaneously treat silica particles with: (1) a polysiloxane corresponding to formula (I) of the instant invention, and (2) an organosilane corresponding to formula (II) of the instant invention *(not containing the optional organofunctional groups in the long-chain hydrocarbon group R)*. The instant specification demonstrates that unexpected results are achieved due to the sequence of process step *(see paragraphs 0028-0034)*.

The instant specification does not show unexpected results for a process where the organosilane features an optional organofunctional group *(selected from the group consisting of vinyl, methacryl, amino, sulfur, and epoxy groups)* in the long-chain hydrocarbon group R. However, this embodiment is not taught or suggested by the prior art. Hence, it is also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
